

include/vm/rv5s/branch  
\_prediction/static\_predictors.h

```
graph BT; A["src/vm/rv5s/rv5s_ex_vm.cpp"] --> B["include/vm/rv5s/branch_prediction/static_predictors.h"]; C["src/vm/rv5s/rv5s_id_vm.cpp"] --> B;
```

The diagram illustrates a file dependency structure. At the top is a gray rectangular box containing the header file path: `include/vm/rv5s/branch_prediction/static_predictors.h`. Below this box are two white rectangular boxes. The left box contains the source file path: `src/vm/rv5s/rv5s_ex_vm.cpp`. The right box contains the source file path: `src/vm/rv5s/rv5s_id_vm.cpp`. Two blue arrows point from the top-right corner of the left box and the top-left corner of the right box towards the bottom edge of the top gray box, indicating that both source files include the header file.

src/vm/rv5s/rv5s\_ex  
\_vm.cpp
